

Tackling the Novel Coronavirus

a Healthy society for Everyone

Tackling the Novel Coronavirus

A selection of projects:

Providing scientific evidence

Infection control

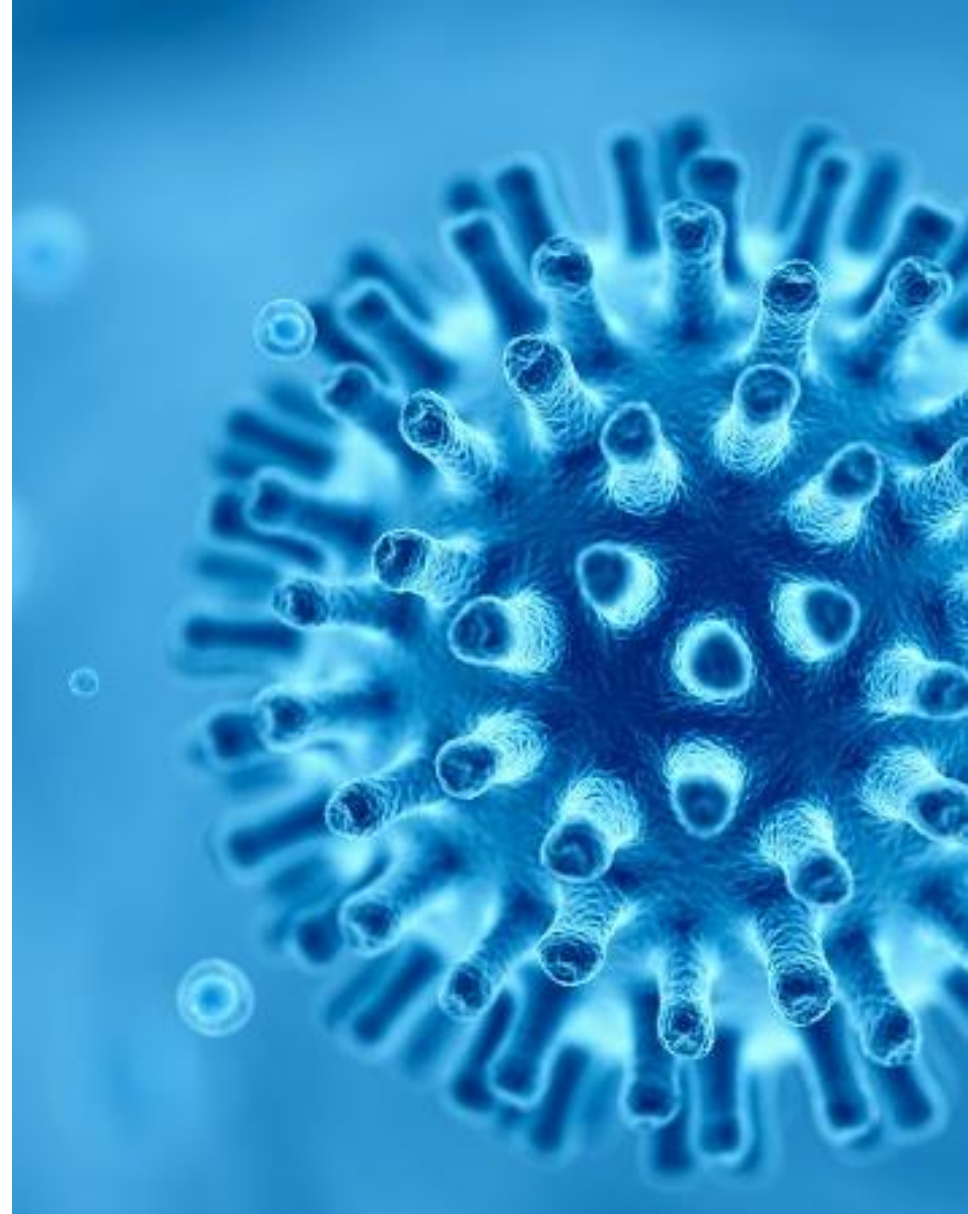

COVID-19 quantified

Taking care of older people

The road to recovery after COVID-19

Tackling the Novel Coronavirus:

Providing scientific evidence

Providing scientific evidence

Rapid and living systematic reviews on:

- **Prediction models for diagnosis and prognosis of covid-19 infection (Laure Wynants et al.)**

Consortium of 35 international researchers

Fortnightly updates in The BMJ

- **COVID19 EPI Update (Maurice Zeegers et al.)**

50 epidemiologists, CAPHRI, RIVM, Cochrane Netherlands and UMC Utrecht
Partner of the WHO Evidence Collaborative.

Early results will be published open access via Maastricht University Library.

Tackling the Novel Coronavirus:

Infection control

Infection control

- Crossborder-border comparison of Covid19 immunity and infection prevention compliance in the Euregion Maas-Rhein (Christian Hoebe et al.)
- The first cross-border introduction of SARS-CoV2 from Germany to the Netherlands: Outbreak in the first Dutch nursing home (Christian Hoebe et al.)

'Dit is de grootste gezondheids crisis sinds de Spaanse Griep van 1919'

Tackling the Novel Coronavirus:

COVID-19 quantified

COVID-19 quantified

General Practitioners: Covid-19 Reporting system of (untested) COVID-19 patients who are receiving intensive and palliative care from GPs outside of hospital (Jochen Cals et al.)

Nursing homes: Registering incidence and course of (suspected) COVID-19 (Jos Schols et al.)

Tackling the Novel Coronavirus:

Taking care of older people

Taking care of older people

Monitoring effects extension visiting arrangements nursing homes,
commissioned by the Ministry of VWS
(Jan Hamers, Hilde Verbeek et al.)
